Tribal Operations and Related Offices will be closed **Monday, January 20st** in Observance of Martin Luther King Jr. Day.

It's NWEA MAP time for students again! This assessment is used to personalize your student's learning and monitor their learning growth. It can do this very accurately because it is computer-adaptive. This means that, if a student correctly answers a question, the next question is more challenging. If they answer incorrectly, the next one is easier. Because the program constantly adjusts as it calculates what a student knows, most students miss about half of the questions. Your child should know that this is normal and acceptable.

Before students begin testing this month, talk with them about their previous testing experiences and make sure they understand the reason for testing and how the computer adapts to their level of learning. Encourage them to do their very best so teachers know where their true learning gaps and areas of strength are. This will ensure they receive instruction tailored specifically to their unique needs.

More information about NWEA MAP assessments can be found using this link: <https://www.nwea.org/map-growth/>
